OUR USERS

Dental SAAS

Dental SAAS is a Complete Dental Clinic Management System, With an Integrated Information System Design to Manage the Online Appointments, Patients, OPD, Billing, MRD, TPA, Expenses, Insurance, Reference & Sharing.

What we are?

Drlogy creates a single healthcare platform for patient, professional and practice to access anytime, anywhere and anyway.

Drlogy provides one touch healthcare solution to empower the user -quick and easy store health records, track fitness activities, access to a doctors and practices, health information and many more surprising things.

We help practices improve the depth of their relationships with patients and improve practice efficiency. Our core is in helping practices through tools like online appointments and practice management, but we're always building new products and services.

Our Team & Culture

We believe in the power of the team for success. Our great team continuously works hard to improve the healthcare experience for all humanity.

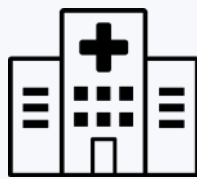

Living our values helps us make sure that our products & services promote quality healthcare for both providers and patients.
