

Yash M. Patel

Age : 21 Years

Sex : Male

PID : 555

Sample Collected At:

125, Shivam Bungalow, S G Road,
Mumbai

Ref. By: Dr. Hiren Shah

Registered on: 02:31 PM 02 Dec, 2X

Collected on: 03:11 PM 02 Dec, 2X

Reported on: 04:35 PM 02 Dec, 2X

ALBUMIN

Investigation	Result	Reference Value	Unit
ALBUMIN, SERUM	11.40 High	3.40 - 5.40	g/dL

Interpretation :

Albumin, which helps keep blood from leaking out of blood vessels. It also helps move hormones, medicines, vitamins, and other important substances throughout the body. Albumin is made in the liver.

Albumin High Levels :

- Dehydration Reduced fluid volume in the body.
- Severe vomiting or diarrhea Excessive loss of fluids and electrolytes.
- Certain medical conditions Such as severe burns or Cushing's syndrome.
- Steroid use Prolonged use of corticosteroid medications.
- Excessive Sweating Intense physical activity or hot weather.

Albumin Low Levels :

- Liver disease Impaired albumin production or liver dysfunction.
- Kidney disease Impaired albumin reabsorption by the kidneys.
- Malnutrition Inadequate intake or absorption of nutrients.
- Inflammatory conditions Such as inflammatory bowel disease or chronic infections.
- Protein-losing Conditions that result in excessive protein loss.
