

**Yash M. Patel**

Age : 21 Years

Sex : Male

PID : 555

**Sample Collected At:**

125, Shivam Bungalow, S G Road,  
Mumbai

Ref. By: **Dr. Hiren Shah**

Registered on: 02:31 PM 02 Dec, 2X

Collected on: 03:11 PM 02 Dec, 2X

Reported on: 04:35 PM 02 Dec, 2X

## SARS-CoV-2 (COVID-19) QUALITATIVE

Investigation	Result	Reference Value	Unit
<b>SARS-CoV-2 (COVID-19) QUALITATIVE</b> REAL TIME RT-PCR			
Type of Specimen	: Nasopharyngeal / Oropharyngeal Swabs		
Result	: <b>Negative</b>		

### Note :

- ICMR Registration number for Covid -19 is LABXX01. Please scan the QR code given at end of this report to check the authenticity of the report.
- Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection. Hence in such cases a repeat sample should be sent. Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.
- Covid-19 Test conducted as per kits approved by ICMR / CE-IVD / USFDA.
- Kindly consult referring Physician / Authorized hospitals for appropriate follow up.
- This is a qualitative test. The Ct values do not provide a measure of viral load due to inherent variability in sampling and kits. According to ICMR guidelines Ct values should not be used to gauge the severity of the disease.)
- It is recommended that RTPCR test not be repeated in any individual who has tested positive once either by RAT or RTPCR (ICMR guidelines).
- No testing is required for COVID-19 recovered individuals at the time of hospital discharge in accordance with the discharge policy of MoH&FW ([https:// www.mohfw.gov.in/ pdf/ ReviseddischargePolicyforCOV/019.pdf](https://www.mohfw.gov.in/pdf/ReviseddischargePolicyforCOV/019.pdf)).

### Comments :

Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Coronavirus disease (COVID-19) is a new strain that was discovered in 2019 and has not been previously identified in humans. Common signs of infection include respiratory symptoms, fever, cough, shortness of breath and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome and kidney failure.
