

Yash M. Patel

Age : 21 Years

Sex : Male

PID : 555

Sample Collected At:

125, Shivam Bungalow, S G Road,
Mumbai

Ref. By: **Dr. Hiren Shah**

Registered on: 02:31 PM 02 Dec, 2X

Collected on: 03:11 PM 02 Dec, 2X

Reported on: 04:35 PM 02 Dec, 2X

PLATELET DISTRIBUTION WIDTH (PDW)

Investigation	Result	Reference Value	Unit
PDW, WHOLE BLOOD Electrical Impedence	15.50	9.00 - 17.00	%

Age Group	Normal PDW Range
Adults	9.0 - 17.0%
Children	7.5 - 13.5%
Newborns	9.0 - 17.0%

Comments :

PDW is a measure of platelet anisocytosis & plateletcrit and is indicative of the volume of circulating platelets in a unit volume of blood. This test is useful in distinguishing Essential thrombocythemia (PDW increased) from Reactive thrombocytosis (PDW normal).

Interpretation :

PDW %	Interpretation
< 9.0	Lower than normal range; may indicate iron or B12 deficiency, bone marrow disorders
9.0 - 17.0	Normal range; indicates a normal variation in the size of platelets in the blood
> 17.0	Higher than normal range; may indicate liver disease, bone marrow disorders, or immune thrombocytopenia

Thanks for Reference
