TRIIODOTHYRONINE (T3), TOTAL

Investigation	Result	Reference Value	Unit
T3, TOTAL, SERUM CLIA	17.40 Low	80.00 - 200.00	ng/dL

Comment:

T3 (Triiodothyronine), hormone in the body, providing important insights into thyroid function and potential thyroid disorders.

Note:

Total T3 & T4 levels measure the hormone which is in the bound form and is not available to most tissues. In addition severe systemic illness which affects the thyroid binding proteins can falsely alter Total T4 levels in the absence of a primary thyroid disease. Hence Free T3 & T4 levels are recommended for accurate assessment of thyroid dysfunction.

Clinical Use:

Diagnose and monitor treatment of Hyperthyroidism

Increased Levels:

Pregnancy, Graves disease, T3 thyrotoxicosis, TSH dependent Hyperthyroidism, Increased TBG

Decreased Levels:

Nonthyroidal illness, Hypothyroidism, Nutritional deficiency, Systemic illness, Decreased TBG
