

## Yash M. Patel

Age : 21 Years

Sex : Male

PID : 555

## Sample Collected At:

125, Shivam Bungalow, S G Road,  
Mumbai

Ref. By: Dr. Hiren Shah

Registered on: 02:31 PM 02 Dec, 2X

Collected on: 03:11 PM 02 Dec, 2X

Reported on: 04:35 PM 02 Dec, 2X

## VDRL (RPR)

Investigation	Result	Reference Value	Unit
VDRL (RPR), SERUM Charcoal flocculation	Reactive		

### Interpretation :

RESULT	REMARKS
Reactive	Indicates presence of IgG & IgM antibodies against non-treponemal antigens
Non-Reactive	Indicates absence of IgG & IgM antibodies against non-treponemal antigens

### Note :

1. Titers of  $\geq 1:8$  and rising titres are significant.
2. Titers are reported only in reactive cases.
3. Positive result indicates ongoing or recent infection and the diagnosis should be confirmed by specific Treponemal tests such as TPHA & FTA- Abs.
4. The reactivity will vary with Primary (60-86%), Secondary (99%) and Tertiary (98%) stage of Syphilis.
5. False positive results may be observed in patients of Malaria, Hepatitis, Mumps, Leprosy, Infectious Mononucleosis, Rheumatoid Arthritis and Collagen disease.
6. False negative reaction may be due to processing of sample collected early in the course of disease, immunosuppression and due to prozone effect.
7. Test conducted on serum.

### Uses :

- To screen for presence of Syphilis infection.
- To monitor the progression of disease.
- To assess the response to therapy (decreasing titres) in patients being treated for Syphilis

Thanks for Reference
